PROFILE

Full-Stack Developer and founder of CodeBolt Systems with experience building SaaS products, automation systems, analytics dashboards, AI-powered tools, and customer-facing web applications. Skilled in React, Next.js, Vue/Nuxt, Python, Node.js, Firebase, PostgreSQL, and modern cloud technologies. Contributed to startup products through AORTEM/VentureSeed, Airtel Networks Limited, and ReadWrite Data Solutions while building solutions ranging from resume analysis platforms to business dashboards and workflow automation systems. Passionate about solving real-world problems through software and helping early-stage startups move faster.

TECHNICAL SKILLS

- Languages: Python, JavaScript/TypeScript, PHP, C++, Dart
- Frontend: React, Next.js, Vue/Nuxt, Tailwind CSS, FlutterFlow, HTML/CSS
- Backend: Flask, Node.js/Express, Laravel, Firebase Admin SDK (Dart), Cloud Functions
- Databases: PostgreSQL, MySQL, MongoDB, Cloud SQL, Prisma ORM
- Cloud & DevOps: Firebase, Google Cloud Run, Cloud Storage, Stripe Webhooks, GitLab CI/CD, Vercel
- SDK & API Development: OpenFeature Provider SDKs, RESTful APIs, JSON Schema Validation (Zod)
- Testing & Tools: Postman/Apidog, Jest, Selenium, Git/GitHub, GitLab, Docker (basic)
- Data & Analytics: Power BI, Tableau, Pandas, Excel
- Other: Feature Flags, Localization, A/B Testing, Secure Auth Flows

EXPERIENCE

VentureSeed (via AORTEM) — Frontend & SDK Developer (Remote)

Stack: Vue, Nuxt, Firebase, Dart, OpenFeature, Cloud Run, Cloud SQL

- Joined VentureSeed as a frontend developer under AORTEM, contributing to multiple internal and client-facing SaaS platforms.

- Worked on IntelliToggle, AORTEM's feature flag and automation product—developed core SDK components and dashboard interfaces.
- Contributed to Firebase Dart Admin Auth SDK and OpenFeature provider integrations, improving developer experience and multi-tenant rollout management.
- Integrated Stripe for secure billing workflows and Cloud Functions for backend automation.
- Collaborated with cross-functional teams across VentureSeed and AORTEM to deliver reliable, scalable frontend and backend features.

Airtel Networks Limited — Technology / Software Intern

- Supported technology-focused projects within a large-scale telecommunications environment.
- Assisted with software, data, and operational workflows while collaborating with technical teams.
- Applied programming, analytics, and problem-solving skills to real-world business challenges.
- Gained exposure to enterprise-scale systems, processes, and infrastructure.

CodeBolt Systems — Founder & Full-Stack Developer

- Founded a software development and product-building initiative focused on SaaS applications, automation systems, dashboards, and business solutions.
- Designed and developed full-stack web applications using React, Next.js, Python, Node.js, Firebase, and PostgreSQL.
- Built AI-assisted tools, workflow automation solutions, and analytics dashboards for real-world business use cases.
- Managed projects from planning and architecture through deployment and maintenance.

ReadWrite Data Solutions — Full-Stack Intern (4 months) | Lagos / Remote

Stack: Next.js, TypeScript, Prisma, PostgreSQL, Zod, React/Tailwind, Flask/Node, MySQL, Git/GitHub

- Implemented full-stack features in Next.js with Prisma ORM and PostgreSQL; validated inputs with Zod and added API integrations.

- Built and optimized responsive components in React/Tailwind; resolved accessibility issues and improved Lighthouse scores.
- Contributed to REST endpoints (Flask/Node) and DB queries; wrote small unit/integration tests and code reviews via Git.

PROJECTS

Hotel Finance Manager (Full-Stack) — React • Flask • MySQL

- Built a financial management platform to help a hospitality organization track revenue, profit margins, ROE, and other key business metrics.
- Developed interactive dashboards, authentication systems, and reporting tools for operational decision-making.
- Designed an intuitive interface for non-technical stakeholders.

Resume Analyzer SaaS — React • Python • AI Integration

- Developed a SaaS platform that evaluates resumes against job requirements and provides personalized improvement recommendations.
- Implemented resume parsing, scoring logic, and AI-assisted feedback generation.
- Designed scalable frontend and backend architecture for future feature expansion.

Business Automation Systems — Python • APIs • Automation

- Built automation solutions to eliminate repetitive manual workflows and improve operational efficiency.
- Integrated third-party APIs, automated reporting pipelines, and data-processing workflows.
- Developed reusable automation tools for business and productivity use cases.

EDUCATION

Caleb University, Lagos — B.Sc., Computer Science (2023–2027, Expected)

CGPA: 4.60 • Awards: Academic Excellence Scholarship – University of Southern Mississippi (2024)

HIGHLIGHTS & INTERESTS

Web apps, data storytelling, and early-stage products/startups

Availability: 30+ hrs/week • Fluent in English

Exploring LLM/GenAI patterns (prompting, basic retrieval, API integration)
